

What Injuries Are Covered by Workers' Compensation?

Overuse/ Repetitive Motion

People in a wide range of industries experience these types of injuries, such as back pain from lifting or carpal tunnel syndrome from typing.

Illness

When an illness or a disease is due to repeated exposure or sudden exposure to a hazardous chemical, bodily fluid or other substance, you have the right to be compensated.

Pre-existing Conditions

If your injury is work-related, you can certainly file a claim, even if you have a pre-existing condition that may have contributed to your injury.

PTSD

In most states, post-traumatic stress disorder (PTSD) treatment will be covered if you were exposed to a sudden and extraordinary event at work.

Assault

If you are assaulted at work by another employee or even a supervisor and are injured, you may have the right to file a workers' compensation claim.
